

To Whom It May Concern:

Paul Jacquin & Sons, Inc. was selected as the General Contractor for our Children's Crisis Stabilization Unit, which is a 13,600 square foot single story institutional facility designed and built in accordance 65E-12 F.A.C. Standards. It is a high-security facility with interior and exterior walls, windows, doors and door hardware all designed and built to be attack resistant. The facility is utilized as a 20-bed Psychiatric Crisis Stabilization Unit for children and adolescents and operates 24/7.

Throughout contract negotiations and throughout the actual construction, we were quite impressed by Jacquin's diligence and professionalism in all matters. From its senior managers to its office personnel, we found Paul Jacquin & Sons to be a company with knowledgeable, capable people in every position. We were particularly pleased with their superintendent, Jody Modine, who did an excellent job of keeping the project on schedule. His on-site supervision of the subcontractors, vendors and suppliers associated with the project was well organized and efficient.

Chris Singley, the Project Manager, did an exemplary job of keeping us informed of the project's progress and of ensuring that the subcontractors followed the procedures necessary to utilize our Not-For-Profit status in order to save Sales Tax dollars. Through his efforts, the project actually came in under budget.

In summary, the staff at Paul Jacquin & Sons made this project a worry-free, enjoyable experience. We are pleased to recommend them without reservation.

Sincerely,

Linda C. Wakefield
Operations Manager
